

Main outcome of the project:

As the main result of the project a complex methodology will be developed, which is new and unique on European level. With the application of this methodology transition between studying and work can

be facilitated, those who complete the training can find employment more easily.

The methodological handbook "Work-based learning in CVET" contains the processes of VET and CVET, applied documents and activities carried out in work-based learning that are important for quality assurance, broken down into the set of six building blocks – Design, Improve, React, Communicate, Train and Assess – as recommended by the EQAVET working group.

The complex methodological handbook is available at <http://www.kormanyhivatal.hu/hu/bekes> under the link Erasmus+ Szakképzéshez kapcsolódó projektek.

How can the quality of VET be improved?

Work-based Learning in CVET

Title of the project:

"Work-based Learning in CVET"

-Work-based Learning in Adult Education

Project number:

2015-1-HU01-KA202-013646

Duration of the project:

1st December 2015 –
30th November 2017

Aim of the project:

Developing a complex methodology – in international cooperation – applicable in adult work-based vocational training based on Finnish, German and Italian models.

The international partnership implementing the project aims to develop a complex methodology, which is potentially applicable in all member states of the Euro-

pean Union, is in line with the aspirations of the European Union, and has been compiled in accordance with the quality requirements set by the EQAVET working group.

Main target group of the project:

Professionals and leaders of relevant organizations involved in adult vocational education and training, further professional training and employment; leaders, professionals and trainers of organizations responsible for conducting practical training implemented in the workplace.

Main activities of the project:

- The foreign partner organizations draw up a handbook according to a uniform criteria which contains processes they apply in adult work-based vocational education and training and good practices.
- Pre-testing version of the complex Methodological Handbook is developed taking into account the Finnish, Italian and German methods.

- Testing the methodology, applying it in practice.
- The complex Methodological Handbook is approved by taking into account the opinions and proposals of experts of the foreign partner organizations in the field of adult vocational education and training and the experiences of testing.
- Conducting surveys – among professionals of the workplace and adult education institution, and learners – to measure the impact of the project at the start of the project and after the testing of the methodology.
- Exchange of experiences for partner organizations in international meetings.
- Organization of multiplier events in all partner countries for promoting the project results.
